Academic Employment

University of Utah

Assistant Professor, Department of Economics, July 2025.

Education

Harvard University

Ph.D. in Health Policy, Economics Track, 2019-2025.

Stanford University

IvyPlus Visiting Student, Department of Health Policy, 2022-2025.

Middlebury College

Bachelor of Arts, Economics major, Math minor, *summa cum laude*, 2016.

PhD Advisors

-- Tim Layton (Chair)
Batten School at the
University of Virginia

-- Anna Sinaiko (Co-Chair)
Harvard Chan School of
Public Health

-- Marcella Alsan
Harvard Kennedy School

Fellowships, Grants, and Awards

- University of Utah VP-NSF Cohort Program Participant – September 2025-August 2026
- NBER Pre-Doctoral Fellowship in Retirement and Disability Policy Research (\$26,352). 2023-2024.
- Horowitz Foundation Grant Trustees Special Award (\$10,000). 2022.
- The Harvard Graduate School of Arts and Sciences Merit Fellowship (\$16,925). 2022.
- COVID-19 Database Research Accelerator Grant, with Jessica Cohen (\$65,249). 2021-2022.
- Alison Fraker Writing Award Honorary Mention. 2016.
- Shelby Davis Undergraduate Four-Year Scholarship. 2012-2016.

Teaching

- *Economics of Health Policy* at the Harvard School of Public Health. Instructor: Anna Sinaiko. Summers 2020 and 2021.
- *Econometric Methods for Applied Research II* at the Harvard Kennedy School. Instructor: Tim Layton. Spring 2022.

Job Market Paper

Separated at Birth: The Fragmentation of Health Insurance and Underinvestment in Preventative Care

Abstract: Health insurance in the United States is fragmented. Americans, and especially low-income groups, receive their insurance coverage through numerous plans throughout their lives and even at one point in time, their coverage benefits can be outsourced to different insurers. This study presents empirical, causal evidence showing that such fragmentation reduces the incentives for any one plan to invest in preventative health. Specifically, I study a policy in New York's Medicaid that carved out very low birthweight newborns from the responsibilities of private plans and placed them under the public state insurance program. Once the carve-out ended in 2012 and private plans became liable for the costs of very low birthweight newborns, pregnant enrollees covered by these plans experienced more preventative care that is specifically targeted towards monitoring and reducing the risk of preterm and low birthweight newborns. These increases were above and beyond secular changes in care experienced by pregnant enrollees in the public program. Moreover, the largest gains appear among African American enrollees and enrollees with a high risk of delivering a preterm and a low birthweight newborn, suggesting that the fragmented regime had not just under-allocated prevention but also misallocated it.

Papers in Progress

“Supplementary Insurance in Medicare: A Ten-Year Update on Take-Up of the Medicare Savings Program.” With Amanda Su and Anna D. Sinaiko. Revise and Re-submit from *JAMA Network Open*.
